

**Your Name:** Ryan Kim

**Date/Time:**

<b>Name of presenter</b>	Jiajun Yu
<b>What is good?</b>	Very ambitious, the topic is interesting, visualizations are nice
<b>What are some risks you can identify?</b>	Doesn't know Python already
<b>What might be an interesting aspect to explore?</b>	Are there UFOs that have been identified in the future?

<b>Name of presenter</b>	Hung Yee Wong
<b>What is good?</b>	Clearly defined visualisations
<b>What are some risks you can identify?</b>	More ethical consideration may be required, as it covers a more sensitive topic (hate crimes)
<b>What might be an interesting aspect to explore?</b>	How does the incident of hate crimes look like compared to incidents of crimes motivated by other factors?

<b>Name of presenter</b>	Erica Ruth Emmanuel
<b>What is good?</b>	Detailed visualisations, have already several results from the research.
<b>What are some risks you can identify?</b>	Ethical considerations, as it is analysis regarding drug usage. The graphs and data might be too cluttered.
<b>What might be an interesting aspect to explore?</b>	

<b>Name of presenter</b>	Yuheng Lin
<b>What is good?</b>	Large, ambitious project, significant process, good view into total process (audio)
<b>What are some risks you can identify?</b>	Might require significant pre-processing, especially seeing from the sets of data, which might result in wasted effort if wrong data is extracted from audio.
<b>What might be an interesting aspect to explore?</b>	Possibly analyse the melodic aspects/lyrics as well?

<b>Name of presenter</b>	Minhaj Ahmed
<b>What is good?</b>	Detailed initial visualisations.
<b>What are some risks you can identify?</b>	The visualisations are often too cluttered.
<b>What might be an interesting aspect to explore?</b>	Are there other cases other than COVID that has affected the crime rates, and how does COVID compare to it?

<b>Name of presenter</b>	Hoang Nam Trinh
<b>What is good?</b>	Simple yet a powerful idea to research.
<b>What are some risks you can identify?</b>	The dataset might be too small.
<b>What might be an interesting aspect to explore?</b>	Are there any other visible changes in stats for the Olympics over the years?

<b>Name of presenter</b>	Huey Pretilla
<b>What is good?</b>	Useful topic, Definitely well-researched in terms of data gathering, has a lot of
<b>What are some risks you can identify?</b>	Quite complex process to gather the data, both in terms of human and machine processes
<b>What might be an interesting aspect to explore?</b>	Possibly creating a graph of Instagram followers?

<b>Name of presenter</b>	Ansh Singh
<b>What is good?</b>	Already lots of extrapolations from data
<b>What are some risks you can identify?</b>	Difficult to see the relationships between various visualisations
<b>What might be an interesting aspect to explore?</b>	How do we know if the accident was within control of the driver?

<b>Name of presenter</b>	Prajanya Gupta
<b>What is good?</b>	Clear explanation of all variables involved in the process, as well as clearly defined topics
<b>What are some risks you can identify?</b>	Success/failure in Kickstarter is binary – it might be possible to analyse the total funding though
<b>What might be an interesting aspect to explore?</b>	How does the distribution of funding for various projects look like?

<b>Name of presenter</b>	Hanwen Wang
<b>What is good?</b>	Interesting topic
<b>What are some risks you can identify?</b>	Needs more correlations, more visualizations, make the visualisations clearer as well
<b>What might be an interesting aspect to explore?</b>	What other personal factors are related to COVID, and do they relate to BMI as well?

<b>Name of presenter</b>	Jian Yi Tai
<b>What is good?</b>	Detailed visualization
<b>What are some risks you can identify?</b>	Some states are bigger/smaller than others, which might affect the variety of data – maybe try a map visualization?
<b>What might be an interesting aspect to explore?</b>	Is there a meaningful change in the weather over time?

<b>Name of presenter</b>	Beh Jie Shen
<b>What is good?</b>	Clear workflow and goals, pretty visualizations.
<b>What are some risks you can identify?</b>	Might be difficult to extrapolate changes in the type of song by just analysing the genre
<b>What might be an interesting aspect to explore?</b>	Are the popularity of songs determined solely by content, or by other factors as well?
